

Form RE-04 REQUIREMENTS: NSPS

STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES AND EMISSIONS GUIDELINES FOR EXISTING SOURCES

(567 IAC 23.1(2) and 23.1(5) *New source performance standards (NSPS)*; NSPS 40 CFR 60 in part)

- 1) From Form **RE-00 REQUIREMENTS REVIEW** you have identified that the facility may be subject to regulations for New Source Performance Standards (NSPS). NSPS are state and federal rules that define limits, testing and monitoring for certain specific emission units. These standards are proposed and promulgated in the Federal Register and published in the Code of Federal Regulations, title 40 part 60 (40 CFR 60) and adopted by the state. Table E lists the standards promulgated through November 16, 2007. Table E (Standards of performance for new stationary sources) may not be complete if a new NSPS has been promulgated since this form was last revised. The best way to obtain current information on NSPS regulations is through the Federal Register since there can be a significant time-lag between the date when a standard is promulgated and when it is finally published in the Code of Federal Regulations.
- 2) Read through the emission source list in Table E. If you have modified (as defined in 40 CFR 60.14), reconstructed (as defined in 40 CFR 60.15) or constructed the described emission source on or after the effective date listed in the table, your facility may be subject to the requirements of NSPS (567 IAC 23.1(2) and 40 CFR 60).

Generally, *modifications* are any physical or operational change to an existing facility which results in an increase in the emission rate to the atmosphere of any pollutant to which a standard applies.

Generally, *reconstruction* means that the cost of a repair exceeds 50% of what it would cost to install a new emission unit. If the facility has had an extensive and expensive repair, it may count as a reconstruction irrespective of any change in emission rate.

If you know or suspect that standards may apply to your facility you must refer to the corresponding 40 CFR 60 subpart and read the requirements in detail to make a final determination. Note: the general provisions found in 40 CFR 60 subpart A apply to ALL facilities subject to NSPS requirements.

- 3) After you have reviewed the list of sources subject to NSPS and read any applicable 40 CFR 60 subparts, check one of the following boxes:
☐ NO, the facility IS NOT subject to NSPS. Go to Form **RE-00 REQUIREMENTS REVIEW**, question 4d and answer NO.
☐ YES, the facility, or a portion of it, IS subject to NSPS, and affected units are listed in the following table.

40 CFR 60 Subpart	List All Emission Units Subject to Each Subpart

40 CFR 60 Appendices provide the following requirements for NSPS sources: reference test methods (Appendix A), performance specifications (Appendix B), determination of emission rate change (Appendix C), and quality assurance procedures (Appendix F). 40 CFR 60 subpart A also contains applicable requirements for NSPS sources.

Go to Form **RE-00 REQUIREMENTS REVIEW**, question 4d, and answer YES.
